**HEMISPHERE<sup>™</sup>**

# HEMISPHERE™

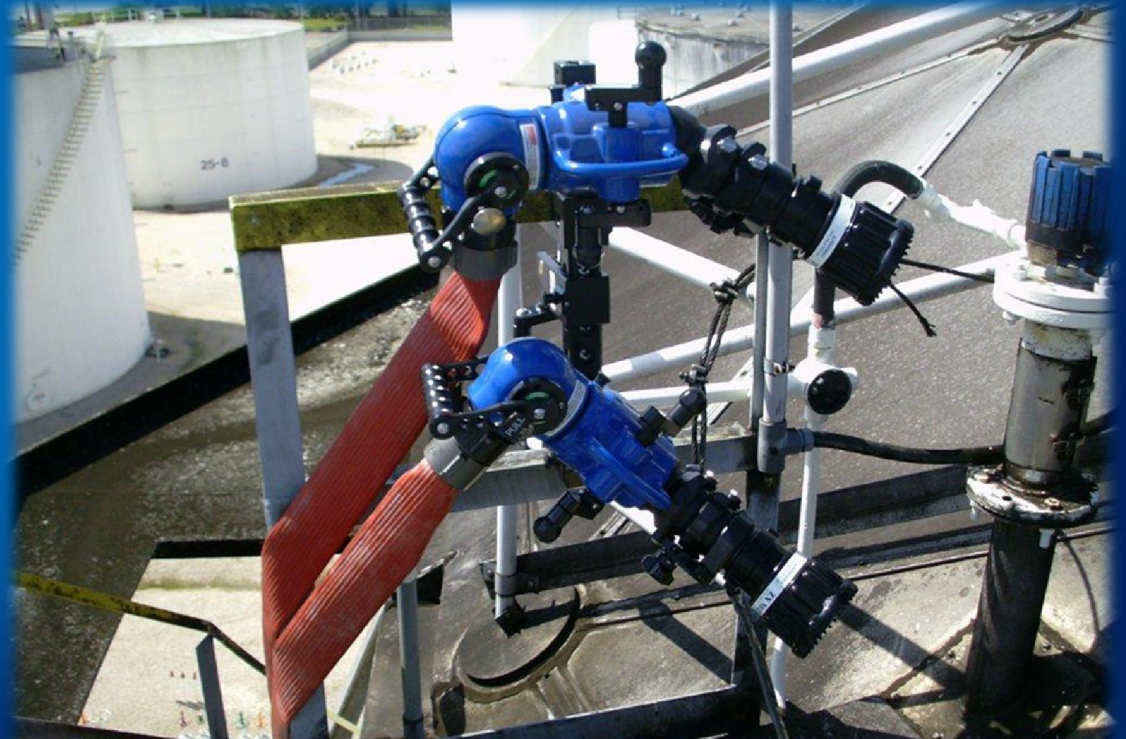

**In April of 2014,**

A Tank Farm in the Southern USA had a 27 meter (90 ft.) diameter Ethanol storage tank with a geodesic dome and a sunken internal floating roof.

The Hemisphere was used to minimize potential hazards

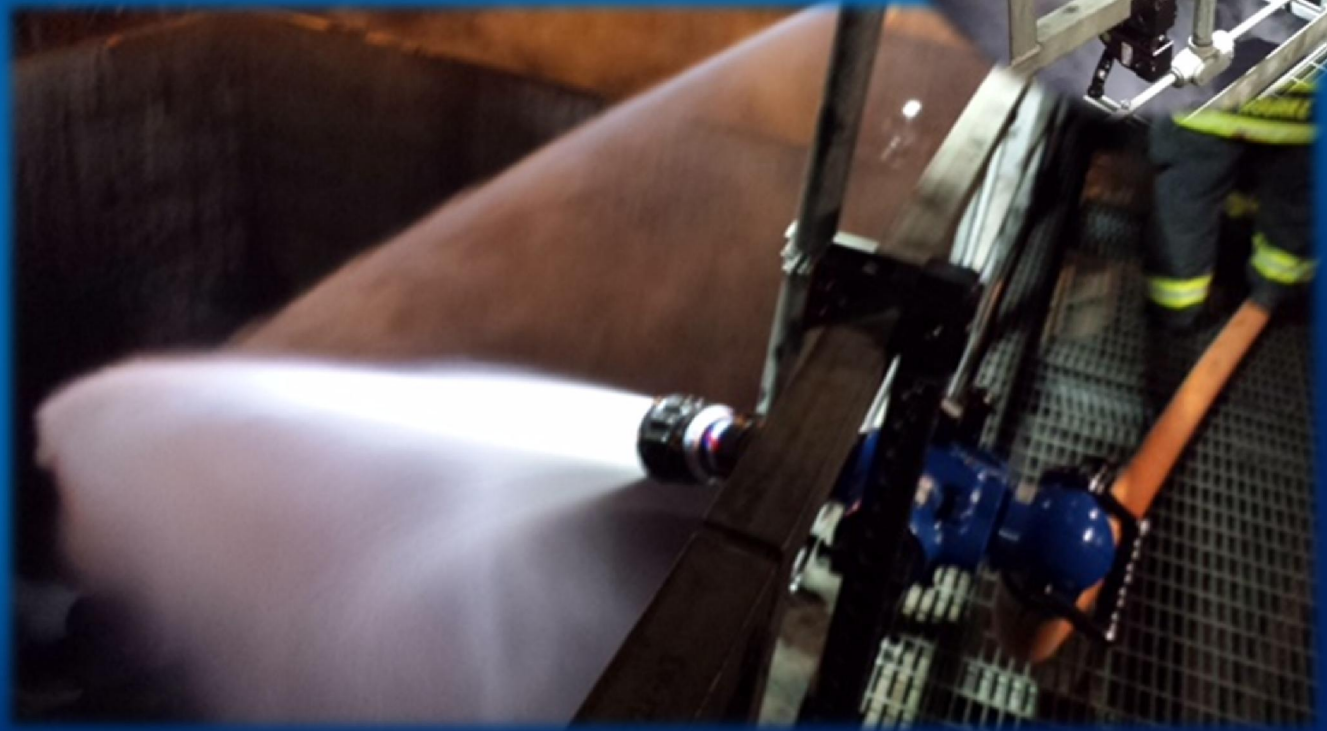

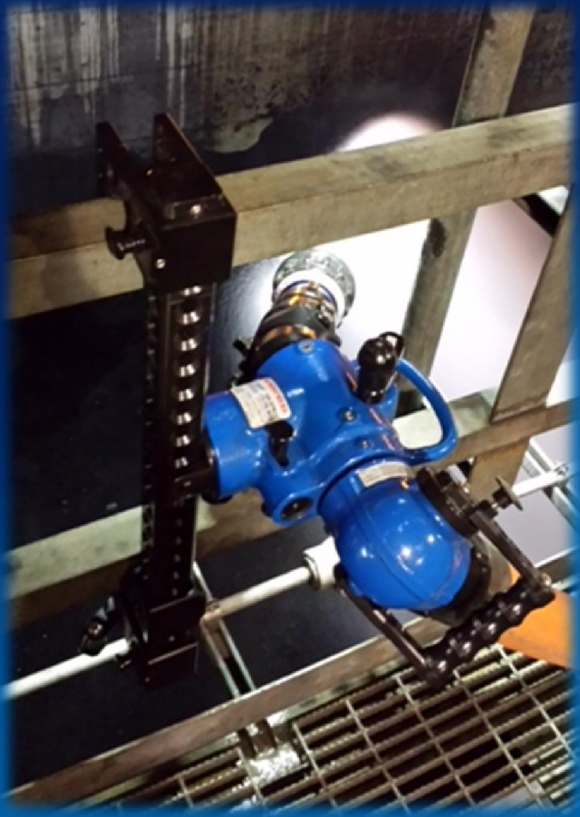

**In April 2014,**

A Midwestern USA refinery had the challenge of a fire in their Coker pit.

The fixed oscillating monitors couldn't reach it.

The Hemisphere was used at low pressure setting and operated like clock work at 21 meters (70 ft.) elevation using water only.

## Training scenario only

A Hemisphere applying foam to the seal area of a tank with a floating roof
