Who is Bulldog Hose Company?

Formerly ANGUS FIRE

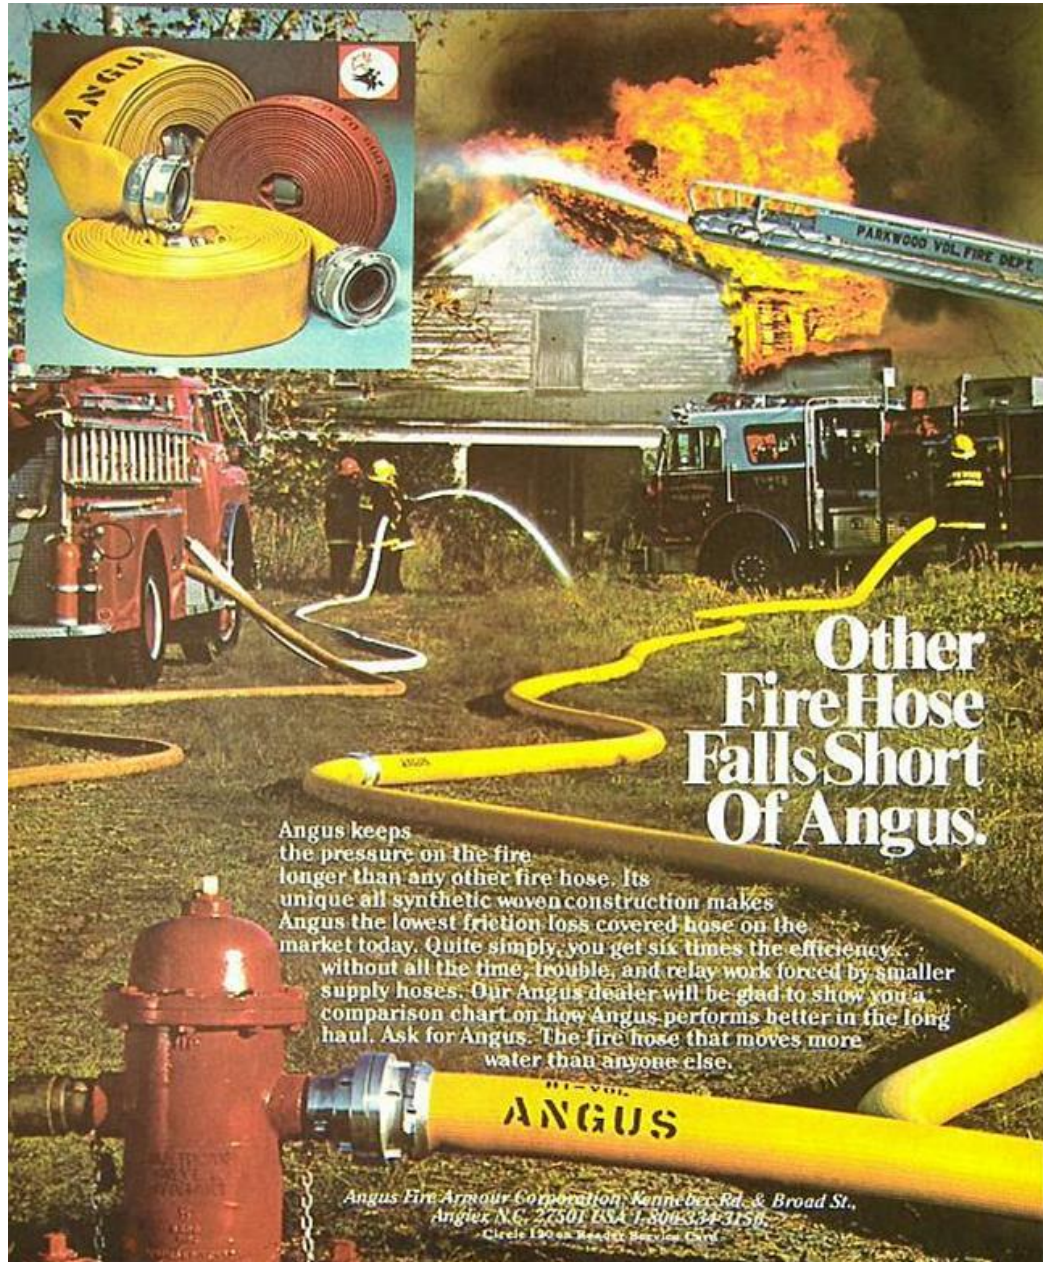

In 2018 Puck Enterprises completed an asset purchase from Angus Fire of the U.S. hose manufacturing equipment and product lines based in Angier, NC and operates as BullDog Hose Company.

Built around:

- Trust
- Teamwork
- Innovation

MANUFACTURING

**Other
Fire Hose
Falls Short
Of Angus.**

Angus keeps the pressure on the fire longer than any other fire hose. Its unique all synthetic woven construction makes Angus the lowest friction loss covered hose on the market today. Quite simply, you get six times the efficiency... without all the time, trouble, and relay work forced by smaller supply hoses. Our Angus dealer will be glad to show you a comparison chart on how Angus performs better in the long haul. Ask for Angus. The fire hose that moves more water than anyone else.

Angus Fire Armour Corporation, Kennebec Rd. & Broad St.,
Angier, N.C. 27501 USA T. 800.334.3158

WHAT DID Angus Fire PIONEER?

- Extruded Through-The-Weave
- Anti-Burst Technology
- Cold Weather Flexibility
 - Arctic Rubber Compound
- Enhanced Chemical Resistance

ULC Listed - Nitrile Rubber Hoses

- Exceeding NFPA Standards

ARMOUR GUARD™

Heavy-Duty Industrial Rubber Hose

- All synthetic extruded-through-the-weave materials allows the hose to expand under pressure decreasing friction loss and increasing water flow
- Compact and unique nitrile/PVC blend with enhanced durability and abrasion resistance
- Ozone-resistant synthetic rubber liner and cover protects from the effects of abrasion, chemicals, and heat

- Industrial water relay operations
- De-watering
- Waste water transfer

The standard color is yellow

Sizes: 1.5, 2.5, 3, 4, 5, 6"

MAINLINE™

TPU – Large Diameter Supply Hose

- Through-the-weave one-piece construction with polyester reinforcement completely encapsulated in a tough polyurethane cover and lining
- Flexible layflat pipeline for emergency and temporary water delivery operations
- Fast deployment and retrieval
- Easy storage and transport
- Long life and maintenance-free service
- High flexibility and kink resistance allows natural ground contours to be followed without stress on the line

Sizes: 7-1/4, 8, 10, and 12”

AQUA GUARD™

TPU - Potable Water Hose

- A flexible layflat pipeline for emergency and temporary drinking water delivery operations
- From individual properties and short term events to emergency and disaster recovery operations
- Fast deployment and retrieval
- Easy storage and transport
- No corrosion
- No bacterial growth

Standard colours are blue and tan

Sizes: 2, 2.5, 3, 4, 6, 7-1/4, 8, 10"

FUEL HOSE™

TPU – Fuel Delivery Hose

- Fuel Hose is a lay-flat, Mil-Spec transfer hose designed to transport fuel
- Fuel Hose is trusted as the bulk fuel supply hose for military branches
- Features a through-the-weave, one-piece construction, with a circular-woven high-tenacity polyester reinforcement encapsulated in a polyurethane cover and lining
- Designed for long-term usage and maintenance-free service

Standard colour is tan

Sizes: 2, 2.5, 3, 4, 6,"

US COUPLING – We Connect

In 2020 Puck Enterprises completed the purchase of US Coupling - Dothan, AL

U.S. Coupling manufacturers couplings, fittings, and accessories for Lay Flat Hose, focusing on Municipal and Industrial Firefighting

- Raw materials from North America
- Machine Centers offering Flexibility and Capacity up to 24”
- In-House Aluminum Anodizing
